

A top-down view of a golf putting green. In the upper center, there is a circular hole with a dark, multi-slatted drain cover. Below the hole, a white golf ball sits on the green. A golf putter is positioned horizontally, with its head just behind the ball. To the left of the putter, the tips of two white golf shoes with brown laces and soles are visible. The green itself is a vibrant, uniform green color.

Putting more green
in your putting green.

Stay truer longer with high-performance infill.

Envirofill® keeps your putting greens performing better longer. It's durable, reusable, and with built in Microban® technology, its resistant to stain-causing bacteria. And, because it's non-compacting it will help your putting green perform its best year after year. Call 800-548-0402 or visit usgreentech.com to ensure your infill is up to par.

The logo for Envirofill, featuring the word "envirofill" in a stylized, lowercase font with a green-to-blue gradient. Below it, the words "HIGH PERFORMANCE INFILL" are written in a smaller, blue, sans-serif font.

Kingsway, Australia

Easy installation. Putting green turf can be very dense and difficult to infill. With its rounded shape, uniform size and smooth surface, Envirofill quickly settles down into the turf saving you time, effort and aggravation.

Consistent speed. Envirofill's highly rounded quartz core resists compaction so the speed stays more consistent over the life of the green.

No more mold and mildew. Microban® antimicrobial protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.

The perfect finishing touch. Envirofill adds a realistic look to your putting green. The special blend of black and green mimics a natural surface, leaving your customers impressed.

PRODUCT DATA ENVIROFILL® 16-30			
Physical properties	Measure	Test Method	Value
Dimensions	98.6% Retained 13-60 mesh sieves		
Materials	99.6% Silicon Dioxide, Pigment and Acrylic		
Hardness	Mohs Scale		6-8
Roundness	Krumbein Shape	ISO13503-2/API RP19C	0.7+
Density	lbs/cf	ASTM F-1815-06	110
Flammability	-	ASTM E648	Non-flammable
Dust	-	Sieve Analysis	Negligible
Angle of Repose	-	ASTM C1444	±30 degrees
TCLP Metals Content	mg/kg	ASTM 6010	<Min Detectable Levels
Abrasiveness	Index	ASTM F 1015	26+/-2
Coefficient of Friction	Direct	ASTM F 1551	0.80 dynamic
Packaging	50lb bags or 3000lb Super Sacks		

Envirofill's exclusive partnership with Microban® provides an added level of antimicrobial protection for the lifetime of your infill.
