Kids & Pet Friendly
Environmentally Safe
Premium Absorbing Zeolite
for Best Urine Odor Control

ZeoFill® is the choice infill for playground and sports field applications. The slow release of water in ZeoFill® granules cool turf fibers by evapotranspiration, just like real sod.

NOTE: Other zeolites have different DNA's that do not have the same absorption ability to properly remove urine smell and could contain chromium (molten glass), lead, lechatelierite, crystalline free silica, magnesium, clay and/or dirt which could block drainage holes.

Benefits of Using ZeoFill® as Infill

- ✦ ZeoFill® is a negative charge infill which captures ammonia found in urine and because of its negatively charged properties, prevents ammonia from turning into a gas, therefore eliminating smell.
- ✦ ZeoFill® granules cool turf fibers longer by evapotranspiration, just like real sod.
- ✦ Works immediately after installation!
- ✦ ZeoFill® is 100% permeable which will not clog turf drainage holes like sand.
- ✦ Chapter 9 - California Proposition 65 Safe from airborne crystalline free silica.

Organic Turf Deodorizer™

- ✦ Made in the USA
- ✦ 100% Natural & Environmentally Safe for your kids and pets. Healthier too!
- ✦ Listed as Organic by OMRI Organic Materials Research Institute as "Deodorizer Infill".
- ✦ "Truly" Approved by Turf Manufacturers and installers in USA & Canada to be the best infill for pet odor control.
- ✦ ZeoFill® is the purest clinoptilolite zeolite in the world which has the strongest absorption ability to remove tough urine odors.
- ✦ ZeoFill® hardness lies between 4-5 Mohs, softer than silica sand but strong enough to withstand heavy traffic abuse.
- ✦ 8 Year warranty against deteriorating for landscape and sports field applications.
- ✦ ZeoFill® absorbs and holds 55% of liquid weight without swelling.
- ✦ ZeoFill® dust will not harm the human body when installing.
- ✦ Tannish in color to match brown thatch in artificial grass.
- ✦ Rated "BEST PERFORMING" odor control zeolite by Synthetic Turf Experts.
